

Interactive Agile...

How high can you go?

Peter Weare

Chris Stratford

Interactive Agile - objectives

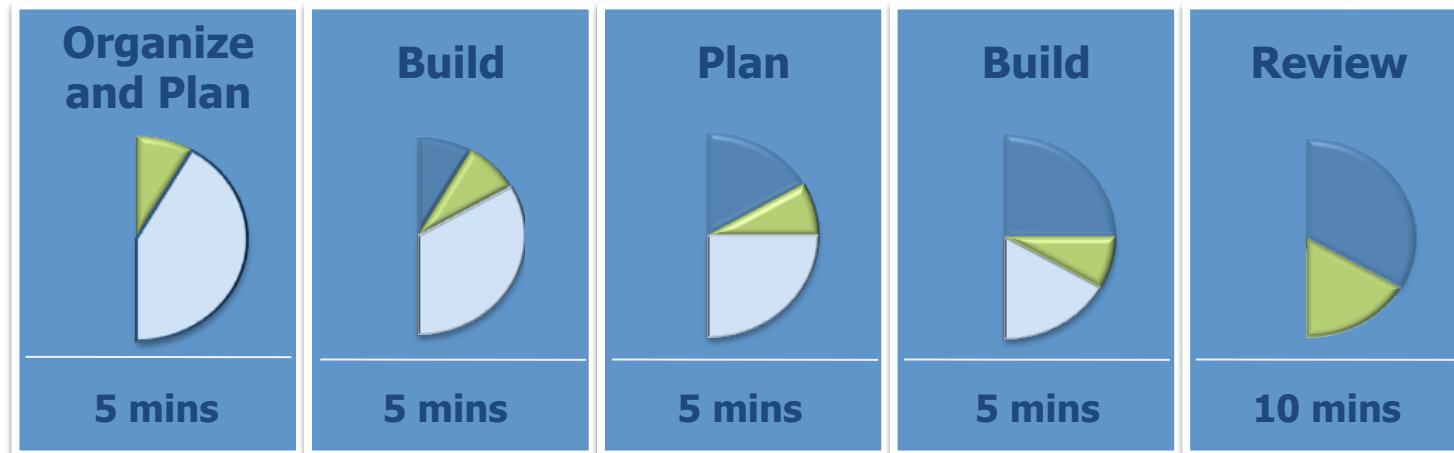

to illustrate one of the key principles of Agile working: we value **people and interactions** over process and tools

for you to **feel what it is like** to work in an Agile way

Over the next 30 minutes...

- You will be divided into two 'teams', each with a 'facilitator'
- You will be given six 'signed-off' requirements for building a Lego tower; each requirement has a benefit value and degrees of difficulty
- You can consult with your business users regarding the design of your bridge
- You will have five minutes to plan your first build
- You will have five minutes to build the first 'iteration' of your tower
- We will then review progress
- You will have further planning time and a second five minutes to build your second iteration

The game plan - timetable

30 minutes →

three **key points** to remember

apply **agile** methods to the right things to get maximum benefit

remember that it's more about **people** and **interactions** rather than process and tools

it's **not just IT** that needs to change

Our **experience** is that **interaction** is critical for project delivery in large organisations...

LONDON METAL EXCHANGE

The Wisereach difference : expert support based on real world experience

About Wisereach and Agile

Wisereach delivers change, projects and solutions with a strong focus on Lean thinking and Agile techniques. We work together with our clients to utilise the right people, processes and tools.

We can deliver solutions for you or work with you to implement a delivery approach that is right for you. We treat the introduction of Agile as a business change event within your organisation enabling you to deliver true business agility.

We have a strong track record of Agile delivery in many sectors including finance, media, telecoms and government.

Our framework focuses on delivering best practice that fits client needs
